

Vet-Approved 'Secret Ingredient' Is a Lifesaver for Dogs Suffering from Anxiety

And it's 100% Natural.

Most pet owners see a near-instant change in their pet...more relaxed, calmer, increased ease in mobility, improved appetite, and overall well-being. This worked even for dogs who couldn't find relief from traditional medication.

While some ingredients found in food given to dogs can be harmful or even fatal, like Xylitol, **this 'Secret Ingredient' is scientifically proven to be a healthful, miracle-like cure for many dogs.**

No Long Waits for Dogs to Feel Better

Start the clock. In as little as 1-hour, your dog will seem like a different pet - with powerful behavioral changes.

This 'Secret Ingredient' has been scientifically proven to:

- **Relieve generalized anxiety disorders in just 1- hour for most dogs**
- **Calm panic disorders, even in dogs who previously couldn't travel or be left alone**
- **Soothe social anxiety disorder, giving dogs and their owners the confidence to go into any situation**
- **Reduce obsessive-compulsive disorder, even calming dogs who chew their paws or flanks incessantly**
- **Successful treatment of post-traumatic stress disorder, especially in adopted dogs who previously suffered abuse and anxiety**

From Helpless To Hopeful

Hundreds of thousands of dog owners, who previously watched helplessly as their beloved family pet suffered uncontrollably from anxiety, have found hope. Their dogs suffered from destructive behaviors like:

- **Chewing their paws until they look like hamburger**
- **Tearing apart furniture**
- **Barking that becomes a neighborhood nuisance**

These owners are now singing the praises of this natural 'Secret Ingredient' that turned their pet's life around.

User Kristin M. said, *“Literally the only calming product that has ever worked with my dog who has separation anxiety!”*

Not only does this ingredient miraculously manage stress in dogs, it has other health benefits. According to veterinarian Dr. Ivana Crnec, **“It relieves chronic pain, supports the immune system, and can be used in the treatment of epilepsy. In a nutshell, it boosts the dog’s health and emotional wellbeing.”**

But just how many dogs are affected by poor emotional well-being?

70% of Dogs Suffer from Anxiety

One recent study published in *Scientific Reports* found that over 70% of all dogs suffer from anxiety disorders and anxiety-related behaviors. Medication is highly prescribed to soothe anxiety.

But the problem with many medications is that, according to Dr _____, “Dogs rarely voluntarily take medication when it is offered by itself. There are several ways to make sure that your dog gets the correct amount of medication”

“We are a fear-free practice and use peanut butter all of the time on our lick mats. Peanut butter that is free from Xylitol (sugar-free substitute) is ok to use and causes very few side effects.”

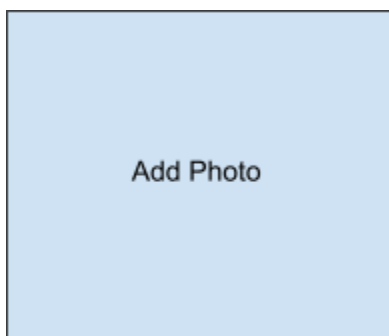

Dr. _____ was asked how she felt about natural remedies for anxiety. She said, “I do recommend CBD oil for anxiety in dogs as well as other products.”

For Some Dog Owners, It’s a Life or Death Difference

This ‘**Secret Ingredient**’ is **CBD oil in Honest Paws Calm Peanut Butter** (Xylitol-FREE). And **Honest Paws Calm Peanut Butter** has made a life or death difference for some dogs and their owners. It sounds drastic, but here’s the truth: **Many adopted dogs have suffered previous lives filled with abuse and neglect, which turn into destructive anxiety disorders in their new homes.**

Anxiety may decrease the dog’s quality of life and lead to aggressive, destructive behaviors towards other dogs or their owners, turning into a relinquishment of the dog or euthanasia. Owners found relief and peace of mind from daily use of **Honest Paws Calm Peanut Butter** which made their adopted dog calmer, settle down faster, and transition into their new home with ease.

“You Saved My Life...and My Dog’s!”

Audrey K. shared her story.

“I rescued a 72-pound dog who was supposed to be 5 years old. Not! - maybe 18mos at best. She is a good dog and very sweet but has

*horrible separation anxiety....which is no surprise. **She was found dumped in a desert town** - no collar, no chip, no one looking for her.*

*I arranged my work schedule to check on her every 2 hours - but the minute I left she's jump from window to window looking for me. **She is not destructive, but her size and energy was causing havoc. She had jumped the stove, and I came home to the burners on.** When she got into a fight with my other dog, I figured she'd have to go - and would have to be the pound - **a death sentence for a black dog with strikes against them.** I remember you once sent me a sample of the peanut butter. I tried it on her the next morning. **She loves it,** and she is now totally chill. **It is such a miracle,** I almost named her that. I come home now 3 1/2-4 hours later, and she is calmly chewing her bone. She plays with my other dog, and there are absolutely no more issues. **Do you believe in magic? Will that what it is like - so now that's her name"***

From Panic to Peaceful - How This 'Secret Ingredient' Benefits Your Dog

The "Secret Ingredient," CBD, in **Honest Paws Calm Peanut Butter**, promotes overall well-being, reduces anxiety, and brings peace of mind to dogs and their owners. The main benefits of CBD are:

Cannabidiol or CBD Promotes Relaxation - Even in the First Use

CBD oil supports calmness and relaxation by changing the brain chemistry and improving the sensitivity to serotonin, which is the feel-good hormone. **Studies show that regular use of CBD has an anti-panic effect that promotes relaxation.**

CBD Supports Normal Emotional Balance - It's A Fast Acting Emotional Reset

CBD works through the endocannabinoid system, or ECS, which balances the nervous system. Anxiety attacks make the nerve cells frantically fire, leading to a chemical disbalance. Supplementing with CBD for dog anxiety, is like hitting the reset button and restoring emotional balance.

CBD Helps Maintain Calm Contentment - Even for Dogs Who Suffer Separation Anxiety

Separation anxiety is a common yet, concerning dog condition. It's triggered by the fear of being alone and causes many of the same changes as other forms of anxiety. CBD for dog anxiety promotes relaxation in anxious pets.

Dogs Love Honest Paws Calm Peanut Butter

Moxyi Honestly loves her Calming Peanut Butter!!

Review by Kimberli E.

*"This product has been a lifesaver for my 12 year old puppy who takes daily medicine. We have been using this for over a year and **Moxyi looks forward to her Calm Peanut Butter everyday.** She loves the taste and it does help her calm and relax. My girl gobbles it right up. Thank you for making such a high quality product and something that **truly makes a difference in helping my baby enjoy her senior years better.**"*

Yummy Peanut Butter

Review by Ronald A.

*"We've given it to our two monsters! **They love it!** The male is hyper-active. This is the main reason we looked at the product in the first place. **The female has come out of her shell. (she was badly abused before we adopted her).** She also loves the peanut butter. We adopted them both at the same time & they've become inseparable.. (Bandit) Female (Bella)"*

Big Success for Mobility Issues!

Review by Anna D.

*"Buster could not even get out of bed in the mornings his legs were so weak. We are 2 weeks in using honest paws and **what a difference I see already! Highly recommended.**"*

Sam's Nightly Treat

Review by Laurie B.

*"Our dog **Sam loves the taste of the calm peanut butter,** we give it to him before long car rides and before bed, as he usually has trouble settling down at these times, do to having anxiety for many years, works great and **we would not want to give him anything else.**"*

Will it Get My Dog High?

Many dog owners wonder if CBD will make their pets high or hallucinate. The short answer is 'no.' There's a big difference between CBD and THC that makes people high. THC is an entirely different compound. CBD is sourced from the hemp plant. And the hemp plant is very low in THC. **So there is no chance of your pet getting high or experiencing any hallucinatory effects.**

Is CBD Safe? Will It Interact with Other Medications?

CBD has no known toxicity, making it very safe for your pet, and it's highly unlikely to cause an overdose. But it's still recommended that you consult your vet before giving them CBD oil for the first time, just to be safe. In fact, many dog owners use **Honest Paws Calm Peanut Butter** so their dog will ingest the medication.

Dog owner, Eida C., said, *"I have been able to give her medicine by putting the pill into the peanut butter, and **that has been a real success for me otherwise almost impossible to give the medication she needs.**"*

Fast, Convenient Home Delivery

Order today and rest easy knowing that your dog will soon be experiencing new levels of well-being and optimal health.
